President Tatar talks to the TRNC British Residents' Society
According to the information received from the Health Department of Girne Municipality, inspections were made on general hygiene and Covid-19 precautions which were carried out between 3rd and 11th February 2021. 1 workplace that did not implement Covid-19 measures was closed and its activities were stopped. In 3 grocery stores, various food products for sale on shelves were found to be unhealthy and confiscated.

Health and Municipality Police Branch Teams carried out a total of 554 workplace inspections during this period and the compliance of the enterprises with general Covid-19 measures was checked.

Girne Mayor Nidai Güngördü stated; “The fact that the Covid-19 mutated virus has been detected in our country, it shows that we must adhere very strictly to Covid measures. We have concentrated our work with responsibility and sensitivity about all the precautions to be taken for the health of our people.”

Güngördü stressed; Our people should consider all warnings as a precaution and wash their hands frequently in order to be protected, use the mask properly and continuously to cover the mouth and nose, not stay more than 15 minutes in closed areas, and only one person going for grocery shopping. He reminded the importance of paying attention to the measures implemented and complying with the rules of distance between individuals. He called to the public, "Let's stay at home and protect both ourselves and all our loved ones from the pandemic."

President Ersin Tatar received the Turkish Vice President Fuat Oktay and his accompanying delegation who paid an official visit to the TRNC yesterday (10th February).

Following the meeting, Tatar and Oktay held a joint press conference. Expressing that they discussed the works for the development of the TRNC with the Turkish Vice President Oktay, Tatar said that he is frequently in contact with foreign mission chiefs, the UN Secretary General Antonio Guterres and the EU authorities. Stressing that they will find an opportunity at the 5+UN informal meeting to express their views, President Tatar said that the Turkish Cypriot side is in full consensus with the Republic of Turkey.

Tatar added “Turkish President Recep Tayyip Erdoğan gave a speech during his party’s group meeting yesterday (10 February 2021) and stressed that there is no solution model other than a two state solution in Cyprus. I want to thank President Erdoğan for his words on behalf of myself and also the Turkish Cypriot people”.

Regarding Greek Prime Minister Kyriakos Mitsotakis's remarks during his visit to the Greek Cypriot side, Tatar said “Mitsotakis did not respect the rights of the Turkish side when he described Turkey as a so-called "invader country."

Greece is responsible for the mistakes made in Cyprus, establishment of EOKA in Cyprus, Turkish Cypriots’ being subjected to genocide, the coup to overthrow Makarios in 1974 and attempts to unite Cyprus to Greece. It is also Greece who invaded the Republic of Cyprus.”

Tatar ended his words saying that the Turkish Cypriot side is doing what is necessary with Turkey to continue its existence with security and to crown its national struggle.

Oktay: No alternative in Cyprus other than a two-state solution

Following his meeting with the President of the Turkish Republic of Northern Cyprus (TRNC) Ersin Tatar, Turkish Vice President Fuat Oktay pointed out : ‘There is no alternative in Cyprus other than a two-state solution, it is time to face the realities.

There are two separate communities, peoples, democracies, and states on the island. Negotiations based on a federation model would serve nothing except to waste time’.

Oktay stated that they also evaluated the Maras issue and the recent developments in the Eastern Mediterranean with President Tatar.

Underlining that Turkey and the Turkish Cypriot people are definitely in harmony on the Cyprus issue, Oktay said:

‘Turkey will continue to give full support to the Turkish Cypriots in order to provide peace, security, stability and prosperity both in the island and in the Eastern Mediterranean.

Our recent contacts and consultations have once more shown our determination to rejuvenate and raise the TRNC’.

Source : TRNC Public Information Office
Tatar: “Two-state solution model being discussed by whole world”

President Ersin Tatar attended the live programme of CNN Türk by a video call and evaluated the current agenda and the Cyprus problem.

Answering the questions of the journalists, Tatar said that the Turkish Cypriot side is in full harmony with Turkey. Stating that a 5+UN informal meeting is on the agenda and the policy of the Turkish Cypriots which has been developed with Turkey is being discussed by the whole world, Tatar reminded that UN Secretary General Antonio Guterres expressed that it is our most natural right to express our views towards the future at the meeting. Tatar stressed that as the President of the Turkish Republic of Northern Cyprus and the Leader of the Turkish Cypriots, what he will express at the 5+UN informal meeting is very important. “All these issues have been brought to the agenda of the whole world. A two-state solution model is being discussed by the whole world” President Tatar added.

Furthermore, stressing that there are two states in Cyprus and that he supports a solution model based on the cooperation of two states living side by side on the basis of equal sovereignty, Tatar said that the complicated structure of a federation is very difficult to be implemented.

Source: TrNC Public Information Office

Erdoğan: There is no alternative other than a two-state solution

Turkish President and AK Party Leader Recep Tayyip Erdoğan stated that there is no alternative other than a two-state solution in Cyprus.

Speaking at AK Party’s Parliamentary Group Meeting, Erdoğan emphasised that the Cyprus issue is a common cause of the Turkish and the Turkish Cypriot peoples, and stated that the troubles escalating with the bloody attacks of the Greek Cypriot side could not be solved with a permanent and sustainable solution despite all efforts.

Pointing out that the Greek Cypriot side constantly avoid sitting at the table with the Turkish Cypriots regarding hydrocarbon resources, Erdoğan said that the embargoes imposed on the Turkish Cypriot side in all political and economic areas are continuing.

Emphasising that it is no longer possible to tolerate this injustice, Erdoğan said,

"The whole world should know that we will no longer allow the Turkish Cypriots to be the victims of the deadlock that has been ongoing on the island for half a century."

Due to the Greek and Greek Cypriot mentality, which ignores the Turkish Cypriot people on the island and has condemned the negotiations to failure for 50 years, there is no point in discussing the old solution formulas again, Erdoğan said:

“The Cyprus issue should be handled in accordance with the spirit of the new era, with a solution-oriented understanding.

The only issue that can be discussed in Cyprus from now on is a two-state solution. We know that our brothers and sisters in the TRNC think and act the same way as we do.

I believe that a future in which peace and stability prevail can be built in the island only if we are not overshadowed by the past and rather draw lessons from it.

If we are to sit at the table regarding the Cyprus issue, we can do that only under these conditions. Otherwise, everyone will deal with their own business.”

Source: TRNC Public Information Office
Tatar: Our determination is to implement sovereign two-state model

President Ersin Tatar made evaluations regarding the Cyprus issue and the statements made by the Greek Prime Minister Kyriakos Mitsotakis and the Greek Cypriot Leader Nikos Anastasiades during the joint press conference following their meeting.

In his written statement, President Tatar noted that while the initiatives for the 5+UN informal meeting are continuing, the stance of the Turkish Cypriot side is very clear and the Turkish Cypriot side will never take a step back from their determination.

Stating that their commitment is towards ensuring their people's political equality, sovereignty, Turkey's full and effective guarantee and maintaining the presence of Turkish troops in Cyprus, freeing Turkish Cypriot people from the minority status and implementing a two separate sovereign state model, which is the only realistic solution, Tatar said that while their efforts continue to implement two different sovereign state model that is compatible with the realities of Cyprus on the other hand the provocation of the Greek Cypriot-Greek duo against the solution still continues.

Explaining that the latest example of this was experienced during the visit of Greek Prime Minister Kyriakos Mitsotakis to the Greek Cypriot side, Tatar continued:

"The statements made by the Greek Prime Minister Kyriakos Mitsotakis and the Greek Cypriot Leader Nikos Anastasiades at the joint press conference have once again revealed that the Greek Cypriot-Greek duo's mentality has not changed and will not change. While the UN Secretary-General's initiatives towards the realisation of the informal 5+UN meeting continued, the Greek Cypriot-Greek duo's unrealistic claims and allegations towards the Turkish Cypriot side and Turkey is in a situation to ruin everything.

In his statement the Greek Cypriot leader Nikos Anastasiades said that he aimed for the removal of Turkey's guarantorship and Turkish troops from Cyprus. While this statement of Anastasiades becomes an invariant aim of the Greek Cypriot side, it is a reflection of the activities they continue to lift Turkey's guarantorship since 1962. As long as Turkey's guarantorship and the presence of the Turkish troops in Cyprus continue, they know very well that they could not reach their aim.

Criticising the statement of the Greek Prime Minister Kyriakos Mitsotakis regarding accusing Turkey of being an occupier, Tatar stated that Mitsotakis tried to hide the real occupier which is Greece. Tatar: "It is Greece who founded the EOKA terrorist organisation, which is the main occupier in Cyprus, supported and organised the Greek attacks launched to destroy the Turkish Cypriot people in line with the Akritas Plan, and organised the 15 July 1974 coup to realise the annexation of Cyprus to Greece."

Tatar finally expressed that his wishes and efforts are to change the Greek Cypriot mentality and to adopt a solution model based on two sovereign states that would bring peace to Cyprus and the region.

Vice President of Turkey Fuat Oktay visiting the TRNC

Turkish Vice President Fuat Oktay will pay a working visit to the Turkish Republic of Northern Cyprus (TRNC) today (10th February).

Fuat Oktay is expected to meet together with the TRNC President Ersin Tatar, Prime Minister Ersan Saner and the Speaker of the TRNC Assembly Onder Sennaroğlu.

During the two-day working visit, talks on a financial cooperation protocol between Turkey and the TRNC will be held.

Source: TRNC Public Information Office
TRNC Presidency made a written statement following President Ersin Tatar’s meeting with UK Foreign Secretary Dominic Raab. It was stated that President Tatar explained to the UK Foreign Secretary the vision of the Turkish Cypriot side to put forth at the 5+UN meeting and stressed that a settlement in Cyprus is only possible on the basis of sovereign equality and equal international status of the two states in Cyprus.

It was stated “The meeting was held in a very sincere and constructive atmosphere at the office of President Tatar. The 5+UN informal meeting planning to be held at the beginning of March and also bilateral relations between the TRNC and the UK were discussed during the meeting. President Tatar stressed that in the stage reached, it has become clear that it is not possible to reach an agreement on the basis of a federation which has continued for 50 years and failed. It was explained that insisting on a failed process will only serve to continue the status quo on the Island. President Tatar also explained to UK Foreign Secretary Raab that the Greek Cypriot side has become obsessed with holding power and wealth in their own hands and that is not only the view of the Turkish Cypriot side but has also been recorded in the UN’s reports. The Greek Cypriot side does not want to share their wealth with the Turkish Cypriots and they work with all their power to exclude the Turkish Cypriots from the international community and continue to put them in isolation.

President Tatar stated to Raab that the Turkish Cypriot side will attend the 5+UN informal meeting with a constructive and positive agenda and explain to attendees the vision of the Turkish Cypriot side that is in full consensus with Turkey as it was stated a few days before with the Turkish Foreign Minister Çavuşoğlu. Our vision with a win-win principle has the quality to contribute peace and stability on the Island and the region as well. During the meeting, the new process after Brexit since 1st January 2021 and the new opportunities for our country and what needs to be done were also discussed. They noted the significant challenges facing the world during the pandemic, and the President asked for the Foreign Secretary’s assistance in obtaining the AstraZeneca Covid-19 vaccine developed by Oxford University for North Cyprus. President Tatar expressed that he trusts the fair stance of the UK which shares the history of the Island with us and expressed his wish for the vaccines. Our President conveyed the views and reservations of the TRNC to the UK Foreign Secretary regarding the changes made in recent years regarding the British Sovereign Base Areas without the consent of the Turkish Cypriot people and the situation regarding the opening of the Base Areas to civilian use other than military use.”

Prime Minister Ersan Saner criticised Mitsotakis & Anastasiades

Turkish Republic of Northern Cyprus (TRNC) Prime Minister Ersan Saner pointed out that Greek-Greek Cypriot duo continued to reject understanding the need of the Turkish Cypriot people to achieve their sovereignty and security.

Via his written statement Prime Minister Saner condemned the statements of Greek Prime Minister Kyriakos Mitsotakis in a joint press conference with the Greek Cypriot leader Nikos Anastasiades during his visit to South Cyprus.

Saner mentioned that it was Greece who created the Cyprus Problem for their Enosis dream and the only invader in Cyprus was the Greek Cypriot side which pushed Turkish Cypriots out of the 1960 Cyprus Republic by the force of arms.

Prime Minister Saner said that Turkey prevented Cyprus from becoming Greek and not only saved the Turkish Cypriots but also saved the Greek Cypriots from the attacks of the of Greek coup. Saner underlined that there is not much to say about the statements of Anastasiades, who had been responsible for the collapse of the efforts to reach a federal solution in Crans Montana and who had voiced a two-state solution but then backpedalled because of the following allegations of corruption as well as pressure from the Greek Cypriot Communist political party AKEL which always behaves in accordance with the church.

The question of the birth date of Covid-19

By Ahmet Abdulaziz....

The problem nowadays is that the more I try not to write about Covid 19, the more I write about it. Unfortunately, this is how things have started turning up, since the start of this pandemic, last year.

The Covid 19 had surfaced in December 2019, but it became news later on when more and more Chinese started getting affected by it in Wuhan city. The virus continued moving ahead, and soon it started showing its face in European countries, and America. Even those countries which had not taken it seriously in the beginning ultimately found themselves forced to take strict actions.

The second wave of the pandemic is fast taking its toll, despite the fact that vaccination has started. Everybody is now thinking about vaccination.

However, right now I am thinking about the first birth date of Covid 19. When should it be recognised? When I think about it, I find it difficult to find a correct answer. When we check out the calendars, it seems difficult to declare one particular date as the birth date of Covid 19.

Some think that in principle, the date when the first Covid 19 was found / invented, is its logical date of birth. Whereas some feel that the real date of birth of the virus is the day when the first Covid 19 virus had slipped out of the doors of some laboratory. But this is not all. Some feel, that the day when the first human being got infected should be considered as the day most suitable to be declared as its birth date.

On the contrary, some circles feel that the date of death of the first Covid 19 patient be declared as the birth date of Covid 19, since that was the day when the world in fact felt the lethal force of the virus.

However, in my opinion the date of birth of Covid 19 has lost its importance now. Right now it's important to guess the date when the whole world will be free of this menace. Though the process of vaccination has started, I am sure it's going to take a long time to get the whole world vaccinated. How much time would it take? One year or more? Let's concentrate on this now.

Tulips new webpage and Apps

Readers Mail ....
From Sue Tilt – Tulips ....

It's difficult to write something positive to everyone in our current climate when there seems to be little to celebrate. However, we have been working hard behind the scenes and have produced a new up to date website which we were able to launch on World Cancer Day (4th February 2021).

Please have a look at it on the link shown below (1)

It is in both Turkish and English and there is still some more to follow as we develop it further.

In addition to the website we also launched our own Tulips app, which when things get moving again we will be able to keep everyone easily up to date with what is happening. You can download the app (via Wix) on the link shown below (2)

Thank you for your continued support

(1) https://www.tulips-trnc.com/

(2) https://apps.wix.com/place-invitesinvite-lp/7d2a2cd7-c1f0-4b24-9787-febb43ed991d
DONATE BUTTON - currently out of action.
Please do not use the Donate Button on our website - we are having a few teccy problems with it.

Please donate via Paypal or by one of our Bank Accounts - details are on the website www.kartnc.org
We will let you know once the problem has been resolved - but in the meantime please donate - due to the current "enhanced" Covid restrictions we no longer have our regular food donation, we are having no visitors to our centre and our Charity Shops are closed - HELP please if you can.

FEBRUARY IS BLACK DOG AND CAT AWARENESS MONTH
For some reason, black dogs and cats face more hurdles than other dogs and cats when it comes to getting adopted. Whether it's that witchy black cat superstition or the mysterious gleam of a black dog's fur, many who work in the rescue field, KAR included, say that at the end of the day, black dogs and cats fill their shelters more than any other colour of pet.
Just have a look at the slideshow of black dogs and cats we have in our shelter. How absolutely adorable are they all and all waiting for their furever home when the restrictions are lifted.
Speaking of restrictions our Rescue Centre is really struggling at the moment as one of our main forms of income, the charity shops, is closed. If you could possibly dig deep into your pockets to help us just a little bit we, and our furry friends, will be so very grateful. You can find our bank details of where to send your donations to on our Website www.kartnc.org BUT PLEASE BE AWARE WE ARE HAVING TECHNICAL PROBLEMS WITH THE DONATE NOW FACILITY ON THERE SO PLEASE DO NOT USE THAT!
We'd love to see your photos of your beautiful black dogs and cats, please post them in the comments.

2 OF THE 5 PUPPIES DUMPED AT THE CENTRE FIND THEIR FUREVER HOMES
Allegra (joyful, lively) and Axe (father of peace) left the rescue centre for their furever home recently.
These poor puppies did not have a good good start to life. They were dumped at the centre with their 3 siblings, desperately poorly with worm infestation and Giardia Echinococcus. But with the love, devotion and commitment of our centre staff they all pulled through. The other puppies from the same litter are ready for adoption too. Do you have room in your home and in your heart to offer one of their siblings a furever home? Here are Allegra and Axle with their new hoomans, settling into their furever home and making friends with the other four legged furries there. Aren't they just wonderful.
Jack the lad ....

"In early October last year, I was found in a dark and horrible car park all on my own with a badly infected eye. I was only about 2 months old and still very small. Luckily I was rescued and taken to the KAR office in Karakum. Although I enjoyed the company of the team at Gladrags they felt I needed to be in a home environment, to try and help with the treatment of my eye and hopeful full recovery, so they called a lady called Yasmin to see if she could foster me until a furever home could be found. I was even made famous in Cyprus e-newspaper on 9th-15th October 2020, not looking my best in the photo though. After being with my Foster Mum for a while I felt that I had made a good impression and I so wanted to stay there – I knew I was cute and knew that if I was very good that Yasmin would realise it too! I was so lucky, as my foster home did turn into my furever home. My new Mum told KAR that I could stay with her furry family and it has been an adventure ever since.

My eye was too infected to save but it couldn’t be removed as I was too young so I stayed indoors until I was big enough to have the operation. Yasmin has a girl who is also small called Chana, and for several months Chana stayed inside with me to be my auntie. She played with me and kept me company until I was old enough to have my big operation. Mind you, I think by that time she was a little fed up with me jumping all over her as by now I had grown as big as her.

At the beginning of January this year I finally had my big operation – castration and eye removed. To be honest I had got used to not having the eye but losing the other bits, well that was a little disconcerting! Not quite sure where they went, but definitely not there now! Chana had to go back outside whilst I was recovering from my operation so that I didn’t get too excited and damage the eye area. My first night was a little traumatic as I had to be rushed back to the clinic just after we got home because my eye socket started bleeding again. Thankfully the team at Garfields managed to stop the bleed and said I needed to be calm to help my blood pressure come down. So that night my Mum decided to sleep on the floor with me to keep me company – I was able to snuggle up and felt so safe. She did this for the next 3 nights until I became more confident and started jumping on her to play in the middle of the night. For some reason she decided it was time for her to go back to her own bed, no idea why.

A fortnight after my big operation, Mum decided it was time to meet some of the gang so for a few weeks she would put me with Ben and Jerry, two lovely ginger/white boys, in the patio room. I could see out into the garden from here and was a little surprised to see there are so many other furry members of the family! During the day I would be in the patio room and in the evening back in the hallway next to Mum’s bedroom. Then at last, I was taken out into the garden!! Wow it was scary, everything was so big and there were SO MANY furry people running around. Most came over to see who I was so I hissed at them to back off, but Mum told me to be nice and friendly. Gradually, after several trips into the garden I feel much more confident and now Mum leaves me to run around on my own more. I did give her a scare on the second day as I disappeared down into the ravine with my friend Ben. Mum was calling and calling, so worried something had happened to me but eventually she found me. I got a little telling off so now I come whenever she calls as I know she worries.

Well that’s my story so far and I’m only just over 6 months old, so it has been an eventful life already. No doubt there will be so many more adventures to come but I am so lucky I was found in those early days and ended up in such a big family with a loving Mum. Oh, and there is another, rather large, boy here with only one eye just like me. His name is Tinker and his story is pretty similar to mine – just hope I don’t get as big as him as he’s about 10kg!! Mind you I do love my food, tee hee.

Thank you so much to KAR for putting me in touch with my new Mum and furever home.

A note from Mum: Jack is a super little boy. Hyperactive at times and gradually learning not to chew on everything but definitely a survivor. Having just one eye has not caused him any problems, he can spot a biscuit from the other side of the room and is interested in EVERYTHING, even watches TV. I am so glad he has had a chance to thrive and has integrated into my large family extremely well. Never be put off taking on a kitten or adult cat with disabilities, they manage exceptionally well given a chance and a loving home."

We have other cats and kittens (some with Special Needs) looking for their Happy Family - once Lockdown has eased please visit them up at the KAR Rescue Center any day between 9 - 1. They WILL be waiting!
Taliya Hafiz releases a new single, Return Home, in response to the worldwide pandemics in collaboration with Award winning artist from the USA, Art Tawanghar.

Return Home appears as a positive re-thinking of the covid-19 lockdown experience but, primarily, tells about our souls, sources of love and peace, rather than about physical dwellings: because Home is where your Heart is…. It was written during the lockdown and tells about the real values that we have in our lives: family, love, friendship, the beauty of the nature, and, of course, health. During these difficult times, it is these values that helped many people on their way. Return Home is about remembering these things and appreciating them. It is about reconnecting with your heart and soul, nourishing kindness and love because it is the eternal Truth of the Humankind.

Check this song out, sing along, and dance! It will uplift your spirits during these times with some upbeat reggaeton vibes, positive message, mellow voice of Taliya Hafiz in a multi-instrumental arrangement by Art Tawanghar. “Return Home” comes in an exceptional 3D binaural version as an international release by Major Hit Records.

**Lyrics, Return Home:**

There is so much to tell
In these unsettling times,
When we try to unveil
What hides between the lines….
Is that an end of bliss?
Or turning point for us?
Or maybe Nature gives
Gives us another chance?
It started months ago
With reasons still unknown,
We had nowhere to go
And sometimes felt alone…
But now it is the time
To open our hearts,
Existing here and now
‘Cause moments flee so fast!

Chorus:

So open Your Heart
Connect with your soul
‘Cause there is still love…around…
So open your heart,
Connect with your soul,
‘Cause there is still love, love, love…
If you return home…
We have no other road
Except returning Home…
With people whom we love
With us, in one same boat…
While Earth is spinning round
We travel all through space,
There’s much else to be found
We have no other road…
Except returning home…
With people whom we love
With us in one same boat…
While Earth is spinning round,
We travel all through space,
There’s much else to be found
In challenge that we face….

Chorus

President Ersin Tatar speaks to TRNC British Residents’ Society

President Ersin Tatar speaks to the British Residents’ Society officials following the visit of UK Secretary of State Dominic Raab

President Ersin Tatar stated that he values expats living in the TRNC because he appreciates their love and support in this country, and has emphasised that a fresh approach can be taken in relation to direct trade and travel between the TRNC and the UK, following the conclusion of the Brexit transition process on January 1, 2021.

The President made the remarks during a virtual meeting which was hosted by the Presidency on Friday evening, with British Residents’ Society (BRS) Chairman Peter Wilkins, Deputy Chairman Mike Diplock and Presidential Foreign Press officer Kerem Haser as the participants.

“I do not see our expat residents as being any different to the citizens of this country, because I know how passionately they love and support the TRNC,” President Tatar said.

The President said that during the discussions with Mr Raab, he had made specific references to the 10,000-plus expats living in the TRNC – although he said the number of British subjects was much higher - as well as the 300,000-plus Turkish Cypriots living in the UK, when explaining the inhumane isolation and its negative impacts on the country.

He said he wanted to exchange views with BRS officials following his “excellent meeting” with Mr Raab “which was held in a sincere and cordial atmosphere.”

President Tatar said that he had asked Mr Raab to look into the prospect of the UK forwarding Turkish Cypriots their share of the Oxford-AstraZeneca vaccine, so that it could be used for the benefit of expats living in the TRNC. He said Mr Raab had reciprocated by stating that he would give instructions to the relevant authorities to look into the matter.

The President added: “Turkish Cypriots are also endeavouring to acquire vaccines. Motherland Turkey has so far given the TRNC a total of 40,000 dosages of the vaccine, which means that a total of 20,000 people will be inoculated as there is a requirement for each person to have two shots. The EU has also sent us some vaccine dosages which are not enough as we actually need at least 500,000 dosages.”

Indicating that he appreciates the concerns of the BRS officials over the ‘lack of clarity’ relating to a vaccination programme, the President stated that this is due to the fact that “we still have not had enough vaccines dosages imported to the TRNC. We are doing everything we can to speed up the process and are exploring all avenues to get more vaccine dosages to the country, to benefit all residents.”

Cyprus Issue and the Turkish Cypriot stance

Stating that it was the first time Mr Raab has visited Cyprus, the President said that he visited both sides of the island, as a five-plus-UN informal meeting is being planned to be held in March that would be attended by the Turkish and Greek Cypriot sides and the three guarantor states – Turkey, Greece and the UK. Mr Tatar stated that he intends to put forward a new vision “for peace and stability for a sustainable settlement on the island that is based on sovereign equality and the existence of two States that coexist side-by-side which are in cooperation with each other”.

He said he had shown photographs of North Cyprus to Mr Raab showing the substantial investments and developments and asked: “How can all of this be undone? The TRNC is as sovereign as the State in the South, because we have all the attributes of a State, from having our elections and laws, to having our own territory, population and state organs.”

President Tatar said he explained to Mr Raab that countless negotiations to achieve a settlement based on a federal model failed time after time over half-a-century, “because of the hegemonic mentality of the Greek Cypriot side in not wanting to share power and the natural resources of the island with the Turkish Cypriots – who are in fact a sovereign people and co-owners with a right to self-determination” and reiterated that “we will insist on the survival of our State.”

Travel and trade with the UK post Brexit

President Tatar stated that they had also discussed the completion of Brexit during the meeting. “I stated my conviction that the UK can take a fresh approach to direct trade and direct flights with the TRNC because it is not bound by the rules of the EU,” he said.

The disembarkation issue for passengers travelling from Ercan airport to the UK during their touch down in Turkey was also discussed between the two officials which President Tatar said was a priority. President Tatar said that he had asked for the British official to look into how this could be reversed back to the old system where passengers could remain in the aircraft without having to undergo a re-screening procedure. Mr Tatar said he had advised Mr Raab that they have reports which showed that Ercan airport complied with international standards, and is suitable like any other airport. He said Mr Raab promised to look into this issue.

Poetry by Nick Vye - Sanctuary

LOCK-DOWN DITTY

Staying at home,
All there alone,
Just me and my phone,
Not allowed out to roam,
I'M ON LOCK-DOWN.

Can't go into town,
Must stay around,
On my own ground,
I'm duty bound,
I'M ON LOCK-DOWN.

Can't exercise my feet,
Feeling quite incomplete,
I'M ON LOCK-DOWN.

You can't go to a bar,
No point in driving your car,
Not allowed to go too far,
Is it all on a par,
I'M ON LOCK-DOWN.

They can't say when it will end,
Haven't seen any friends,
Don't know what's round the bend,
Can we ever make amends,
THIS IS LOCK-DOWN-AMEN !!!
Hot water tank problem, my lifesaver was plumber Abuzer Biçer

By Margaret Sheard ....

It always seems to be sod’s law that when there are lockdown restrictions something goes wrong in the house. Last year (2020) as lockdown just started my vacuum cleaner died and there were no electrical shops open to buy a replacement, bit of a nightmare having to use a broom!

As lockdown was approaching this year lo and behold my immersion tank decided to give me problems and we had no hot water, another nightmare, but luckily I saw on Facebook someone else with water problems and they mentioned the name of a plumber.

This was Abuzer Biçer of Cyprus Plumber Technic, so I decided to call him to see if he could help. Yes he could, and he arrived the following morning at the time he had agreed. Abuzer changed some of the parts on the hot water tank so we were able to get hot water again and at last have a shower, but unfortunately he told me the tank itself was ‘kaput’ and I would need a new one. He arrived the following morning, again right on time, and fitted a new tank (with a 2 year guarantee!). A very good job carried out with no mess and everything changed and removed was taken away.

Abuzer visited my sister who was also experiencing water pump and toilet flush problems and he proceeded to sort it out for her. There was a further problem after the work was completed but following a phone call to Abuzer he returned to do some further work and this has resolved the problem satisfactorily.

I was very impressed with the work done by Abuzer and would have no hesitation in recommending him for any plumbing/water problems. He can be contacted on 0548 8716766 or via Facebook link shown below.

Thank you Abuzer, you were a lifesaver at a very stressful time.

**Hope 4 Pets - News Update**

**Update from Stephanie Harrison-Croft**

Just look at Bailey who is another one of the family of 8 who Hope4Pets rescued from the side of the Girne Bypass who found their homes in the snowy UK. So uplifting and makes it all worthwhile.

**Stephanie Harrison-Croft - 4th February**

This beautiful boy who was born with physical difficulties as you can see. He needs to be a house cat. He will use a pad for his toileting, is neutered and vaccinated and all that he needs is a loving home.

Please contact Firdez Backlacı at Animates on 0539 1010666 if you would give this handsome chap the love and home that he is craving. Thank you

**Stephanie Harrison-Croft - 8th February**

Sadly NOT ONE of the puppies have found a home from the 5 remaining Alsancak 8 puppies who are in grave danger struggling on the street and at risk of death by poisoning from local shepherds as a goat was killed by other dogs, other than this LUCKY little one who now has a potential home in the UK and we need desperate foster care for her in the Akancak/Lapta/Karşıyaka area to keep her safe until she can at least find permanent foster while she goes through travel prep to the UK (which would be perfect and all food and veterinary costs would be paid for) or until we can get her into private kennels where COVID-19 area restrictions are in the way right now. She could hopefully be collected from Garfields vet clinic if I can arrange this where she will need bloods taken (again at our cost). Would any of our members please help us and her out with this essential key role rescuing and homing this lovely girl?

**Elizabeth Stowell - 11th February**

Thank you Anne-Marie Davies

Fundraiser for HOPE 4 PETS NORTH CYPRUS by Anne-Marie Davies
Stephanie Harrison-Croft - 6th February

UPDATE.
Our lovely members are being very generous and along with some promised donations to come in we now hope to get all 9 puppies 3 x DHPPi vaccinations each, worming and flea and tick treatments done along with supplying puppy food for them all. Thank you all.
They will go to the vets tomorrow for a check up and their veterinary care will commence.

Well here I go on the beg again.
Not for myself of course but for yet another litter of 9, yes 9, puppies to provide veterinary check ups, worming, flea and tick treatment and vaccinations. Puppy food is obviously high on the agenda too.
Their saddest of tale is that their Mum was sadly poisoned along with another stray and died and all the 9 puppies are now orphans. They are currently with William Sharpe. The are 7 little girls and 2 little boys and are actually 6 weeks old today as William says as he has kindly helped Mum from the start. His message is below.
Hi all, a street dog came and gave birth in our garage and we have been caring for them so now we have 9 puppies 5-6 weeks old and just recently 1 street dog had been throwing up and died and now the mummy dog has done the same. Is there anywhere I can take them or anyone who could care for these puppies as they have no mum to feed off... TIA!
(I Should have mentioned before)
I can’t care for these puppies at this moment in time, I have 3 kids, I live in a rented house and I’m not getting paid as I’m not working due to lockdown. We are living on minimum expenses so this is why I’m asking for someone to take them or somewhere I can take them. PS: We think the 2 dogs had eaten rat poison as they had the symptoms....
Sooooo here we are again. More puppies in dire need of YOUR help - PLEASE
We are looking for 3000 tl/ £300 to cover these costs and every penny or lira counts. We have almost 9K members so I am sure that this is achievable between us xxx
Please donate anything at all via the below links or directly to Fuat Gulyaz at Garfields with reference "9 orphaned Pups"
Thank you x

Stephanie Harrison-Croft - 9th February
All the 9 puppies orphaned after their Mum was poisoned had their vet check yesterday and were wormed and flea treatment given. They will start their course of DHPPi vaccinations in a few days time. Food has been provided with more to come!
Thank you all so much once again to our wonderful members who have donated to help them all. Your response has been nothing short of remarkable.
RUSUK talk about My Great Loss

My Great Loss

As I go through the fifth decade of my life, being in the middle of it, I could say I've had enough losses, big and small, tangible and intangible, personal and of any other kind. This is no surprise: everybody hurts. We all have something to talk about.

But when I think of the biggest one, or the hardest to go through or the most memorable one, I’m in doubt to point it out.

In 2009 I took a decision in my personal life that I now sometimes regret in a way. Looking back from today I’d probably would have chosen another road but back then I thought I was right. I feel sometimes that my life would’ve gone in a more natural way to me. But… There’s no sense to regret it now as you can’t rewind your life. So why worry? You can only learn this lesson, analyze it and go on.

This is what I’m trying to think.

Another big story was my cat, Freddy, named after Freddy Mercury. I got him when he was only about two months-old, taken away from his mom too early. It was a present to me – this is how he came into my life. He was obsidian black, as black as anthracite, black nose, too, light-green eyes.

I was renting an apartment back then in 1999 living alone so I was everything to him, more than a mother. I remember when I was going to work in the mornings, he was crying like a baby trying to keep me home… he was a baby… Freddy was going mad at me because I was still leaving him… sometimes he was waiting for my return and then peeing on my pillow as revenge, looking right into my eyes in the process. I believe those events in his early life reflected on what he has become: Freddy wasn’t a cute to sleep on your knees. He wasn’t a nice cat. He was sharp and sometimes aggressive. But he was always hanging around me and if I was moving from one room to another, seconds later he was following me. Funny…

Once he fell down from my apartment’s window, it was the 9th floor. I remember moments when I just went back home and nobody met me: it looked suspicious as he was always waiting for me to return. I was desperately searching for him in my small flat and then I noticed the half-opened window in the kitchen… I went down anticipating to find his body. Then I found him. I think he flew through the trees and managed to take the right position to land. He was very silent: not a sound. I drove him to the vet in the night: he was fine, not a scratch, just shocked. I think he was re-born that day.

Freddy died on April 5, 2013. The last year of his life he had a major kidney problem so it was everyday injections just to keep him alive. He’d been having ups and downs, better days and worse days during this last period… It was a nightmare. He died in my hands.

Literally the next day after I buried Freddy I had a dream: a bright morning, the room was lit up with sunshine and I was sleeping in my bed. He came up to awaken me. Just like he’s been doing it many many times. I remember the sunlight all around and a very joyful feeling shining through, very realistic. I woke up happy. I still think he was saying goodbye to me coming to see me for the last time.

I’m sure I would face massive losses in the years to come.

But so far it is Freddy. My beautiful cat with a very bad temper.

***************

Roger

My great loss…

I was barely seven years old when my parents came home with a brand new 45rpm record – a 1959 chart hit for a chap called Wink Martindale. It totally fascinated me.

First of all, what a stupid name, how could anyone be called Wink, unless they had some sort of eye impediment? Secondly, having been attending piano lessons for some three years, and already having the ability to read and write musical notation, the opening lament of this record mesmerised me. It was played on a harmonium, and the haunting melody continued throughout. There was no singing, just our Wink telling the story of a soldier who was arrested for playing cards in church. You can hear the original track on the link shown below.

I decided I wanted to write this melody down on music paper, so I could play it on our piano. So I set it up on the family record player, or gramophone as my parents used to call it, and the tune played. I immediately wrote out each note of the melody onto the music paper as I heard it. In the correct key as well. As soon as each note sounded, my brain instantly worked out the note.

https://youtu.be/kLwQvjH7-Qw
I thought nothing of this ability at the time, because I assumed everyone could do it! I didn’t even realise I had “Perfect Pitch” until many years later, when somebody told me that, apparently, only one in 10,000 musicians possessed it.

Later on, I had a lot of fun, like in the music room at school, where I would get my mates to play random notes on one piano, and, from another piano on the other side of the room, instantly replay the very same notes.

This capability saved me a huge amount of man-hours during my musical career, where I could listen to any piece of music and instantly transcribe it, knowing exactly the correct key and notation.

Until fairly recently, that is. I began to notice that when doing what I’ve always done, and transcribing some music, my ear was telling me the notes, but sadly, a semitone, or sometimes even a tone higher than reality.

So, somehow, and I’ve no idea how this has happened, I’ve lost it. I still enjoy pretty good pitch, but it’s no longer perfect.

And that’s a big loss to me.

***************

I do enjoy writing these articles. Some are a chance for me to vent about wrongs committed and others just make me smile. This article made me look inside.

See, what I most regret losing isn’t a material item: It’s the innocence of my youth. I have never sought money or material things; I wanted the world to be a better place. I know better now.

Naivety is both a curse and a blessing. I was always an easy mark and a sucker for any line. Trying to find the best in everyone caused me great pain more than once. I miss that.

I can find joy in things others would consider silly: blowing bubbles or humming dramatic music when I pick up a knife. Much of that is gone now, replaced by life grinding my soul to dust.

Don’t get me wrong, I still believe the future is better and there are opportunities ahead. But I know I have lost something that I valued. A very real part of who I am. Maybe I can get that piece back someday.

Forgive me, I’d rather not write about this anymore.

Planned Drone flights to be submitted to TRNC Civil Aviation Dept

Institutions that will make an Unmanned Aerial Vehicle (drone) flight are required to inform the Civil Aviation Department (SHD) at least five days in advance of the coordinates of the area to be flying, or the name of the region, the day and time interval to ensure a safe flight.

In addition, when drone flight is requested within an area of 8 km, including Ercan and Gecitkale airports, it is necessary to apply to the Civil Aviation Department at least one week before to establish coordination.

St Andrew's Church, Kyrenia: February Lent 2021 magazine

For those followers of St Andrew’s Church, Kyrenia, we are pleased to share with you their February Lent 2021 magazine which is so full of information. PDF link shown below.

SERVICE TIMES FOR FEBRUARY

Due to the recent Government announcement regarding the holding of religious services, the church is closed until further notice.

When church services are able to recommence there will be an announcement on the St Andrew’s Church website.

Given the current and constantly changing situation, Thursday Morning Praise will revert once more to the E-Service version only.

For any further information or updates as the situation changes please see the church website or contact the Church Wardens.

Below is a link to an on-line Sunday service from St Helena’s Church, Larnaca, Cyprus (1)

Should S Cyprus return to lockdown, St Paul’s Cathedral church will once more be providing a zoom service, details on link shown below (2)

A letter from Pat Etherington is included in which she talks about the Covid-19 restrictions and how her garden is progressing.

In this latest magazine the are many other interesting articles from around the world to keep you fascinated and entertained.

ARUCAD begins Doctoral Education in Spring Term

The Arkin University of Creative Arts and Design (ARUCAD) is starting to accept students for its 2020-2021 Academic Year Spring Semester.

Candidates who apply for doctoral programs in the Spring Semester of the 2020-2021 Academic Year will be able to choose programs in the fields of Architecture and Arts and Cultural Management. TRNC citizens and international students will be able to apply for programs in which the medium of instruction is in English.

ARUCAD, which provides Art-Design-Communication-oriented education with its internationally recognised artists and academic staff, offers a creative environment for candidates who choose doctoral programs in order to understand the theoretical and practical problems of different disciplines, and to produce concepts and works by interpreting them with their own unique approaches.

2 New Doctoral Programs from ARUCAD

Rector Prof. Dr. Asım Vehbi stated that ARUCAD has graduate programs with/without thesis, and added, "We began accepting students for the 2020-2021 Academic Year Spring Semester after obtaining approval for the opening of two doctoral programs in Architecture and Art and Cultural Management." Rector Vehbi underlined that the evening classes are an important opportunity for candidates who cannot access training programs due to their busy working lives.

Up to 100% Scholarship Opportunities

ARUCAD provides scholarships up to 100% for TRNC citizens and international student candidates who apply for doctoral programs in Architecture and Art and Cultural Management.

Candidates can obtain detailed information about the doctoral programs on the arucad.edu.tr website and by calling (0533) 855 69 69.

ARUCAD provides graduate education at the University's Kyrenia Campus to anyone who wishes to obtain a privileged career and specialise in Art, Design and Communication.

TULIPS IS ABOUT TO CLOSE!

Tulips WILL close in March 2021 without your help

As COVID-19 continues to spread, the future has never felt so unpredictable. We know these are challenging times for us all right now and Tulips is doing everything possible to sustain daily operations whilst continuing to provide care to their cancer patients.

Tulips, with your help, has ‘limped’ along since 14th March 2020 when the TRNC (North Cyprus) locked down the first time however they now find themselves on the brink of closure. No events or fundraisers can take place and a second lockdown is upon us with no knowing for how long. Tulips has not been able to pay staff wages due on the 1st February and with the 1st March so close they do not know how they will manage. The TRNC Government does not pay for the wages of some of the hospital staff, Tulips does. Tulips also looks after cancer patients who simply would not have treatment if they were not there to support them.

Much of the world has stopped however the mission of Tulips helping cancer patients in the TRNC has not, therefore we are asking you to help Tulips cover the cost on continuing their work by making a donation.

Making a donation of any size today will go a long way towards protecting Tulips and help their mission to continue to help cancer patients in the TRNC.

If you’re unable to donate at this time, you can still support Tulips. You can promote Tulips by sharing this with a family member or friend. Even a quick mention on your social media would mean the world to us.

Now, more than ever, our community needs Tulips and Tulips needs you.

Stay safe and well

Please support Tulips by:
2. Make a pledge (we will collect when it is safe to do so) via our Website: tulips-trnc.com or Facebook: Tulips/Help Those With Cancer Association

For further information please do not hesitate to call: 0542 854 8714
Girne Municipality gave vaccinations and PCR tests

696 people were vaccinated at the Girne Municipality Social Life Center between 1-4 February 2021, and 990 PCR tests were performed in the last two days at the Girne Municipality Leymosun Culture House. In the works carried out in cooperation with the Ministry of Health and the Municipality of Girne, the citizens waited by paying attention to the social distance rules. Despite the intensity in both centers, citizens left the organisations satisfied.

Girne Mayor Nidai Güngördü pointed out the importance of the unity of all institutions, organisations and people in such a difficult time and stated that they are always ready to help in this process together with the municipal staff. Expressing that the health and safety of the public is a priority, Güngördü noted that they have received very positive feedback from the citizens who visited both centers, honouring both himself and his staff.

Girne Municipality continues its COVID-19 spraying work

In respect of the measures taken against the Corona Virus pandemic, which threatens the world, the Municipality of Girne routinely continues its spraying activities in various parts of the city.

In the statement made by Girne Municipality regarding the effect of the Corona virus (Covid-19), which affects the whole world, and continues in our country, information was given that the health teams affiliated with the Municipality of Girne routinely continue their spraying activities in various parts of the city. Every day, disinfection works are continuing in the New Port passenger halls, New Port Authority, New Port Customs Building, Girne Municipality New Service Building, District Governorship, Leymosun Culture House, Girne Municipality Social Life Center, Girne Police Station and Village Headquarters.

Girne Mayor Nidai Güngördü stated that all the measures taken for the health of the people continue to increase. Güngördü stated that the Covid-19 pandemic is still continuing and in this context, they are expanding all the necessary measures within the framework of possibilities. Pointing out that spraying efforts are continuing in various parts of the city, Güngördü noted that in order to overcome the pandemic with the least damage, our people should take into account all warnings and maintain their sensitivity with regard to masks, social distance and hygiene.
